

New... New... New...

The new soft ice-cream machine SPM has recently launched on the market opens new horizons in the development of soft ice-cream. It multiplies the opportunities for small local restaurants to serve a good ice-cream with a minimum cost, without the need for specific staff and with a small and elegant piece of equipment on the counter.

A true innovation, SPM new GT1. Almost a revolution in the world of ice-cream that becomes accessible to all shops, even the smallest, with a minimum investment and a very small space.

This victory of SPM technicians has been made possible thanks to both a new system of temperature control and a bowl from the specific design that allows a better blending of the product.

These features make SPM ice cream machine a unique product on the market but also a practical, economical and easy to manage appliance.

Soon also model GT2 will be ready. It will allow to prepare two different flavors of ice-cream at the same time.

Ice-cream is always ready to be served in the transparent bowl.

The preparation is easy, because you have to add to the basic product (available in different flavors) only milk and nothing else.

SPM: FROZEN * CHILLED * HOT

A GOOD SPM ICE-CREAM

Dense, but soft and tasty. It can be served in a cup as a spoon dessert. Or you can serve it in the classic cone. The result does not change because the dough is smooth, creamy and consistent. Nothing more than a good ice cream.

SPM

DRINK SYSTEMS s.p.a.

www.spm-ice.it

SPM has been for decades a leader in the production of slush, mix and post-mix dispensers for cold beverages and specific dispensers for the preparation of hot beverages like coffee, chocolate, etc..

The careful preparation, the use of first quality components and the integration of original ideas, often covered by a patent, make SPM the most reliable products on the market and the simplest and safest ones to be used.

The web site www.spm-ice.com is complete, well prepared and easy to be used in both the Italian and the English versions.

Ice dream

For a wonderful slush

It is perhaps the most practical and easiest machine to be managed, besides the most versatile model in the wide range of slush machines produced by SPM.

The simplest solution to prepare ices, milkshakes, sorbets and frozen specialties in general.

Every bowl has its own independent refrigeration system. The lid is reversible (front/back) and it has its own lighting system.

Ice dream is available in three versions (1, 2 or 3 bowls) and is equipped with a blending system (patented) that avoid the creation of ice in the bowl.

Ice dream is a compact and handy slush machine even if its bowls have an important capacity (12 liters each). Upon request it is available also in the water refrigerated version.

Hot Wonder

The perfect dispenser for chocolate, coffee, milk and for hot beverages in general.

Hot... Chilled... Frozen...
